

## Geometiles Earns Four Prestigious Awards

San Diego, CA (Sept 1, 2017) – Imathgination LLC is proud to announce that its 96-piece Full Set of **Geometiles** has been honored with four esteemed awards just in the first year after the launch of this fun, educational toy. The awards include:

- 2017 Academics' Choice BRAIN TOY AWARD
- The Creative Child Magazine 2017 KIDS PRODUCT OF THE YEAR AWARD (Kids Educational Products category) and 2017 CREATIVE PLAY AWARD
- 2017 BRAIN CHILD Tillywig Award

### Here are some highlights from the reviewers:

*"What a fantastic (yet simple) product! Geometiles deliver on their claim to make exploring math and geometry fun. There are limitless possibilities for making 3D shapes. I have watched my kids (ages 7 and 4) play with these for hours! I had to drag them both away when it was time for dinner (this never happens). Honestly, I got carried away with the fun of these shapes, too."*

- Academics' Choice Award

*"Really great packaging, the box was very eye-catching. The interlocking tiles makes learning math fun for kids of all ages."*

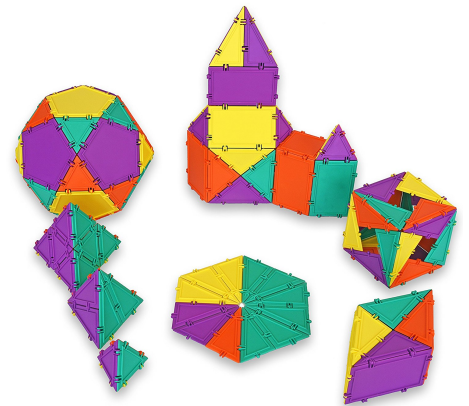

- Creative Child Magazine

*"As an educator, I am excited to bring these into my classroom and share them with fellow teachers. I see endless opportunities for building and enhancing geometry skills but also for center/choice time where creativity and sharing within small groups of students would be ideal."*

- Academics' Choice Award

### More about the awards:

**Academics' Choice Brain Toy Award**, a prestigious seal of educational quality, reserved only for the best learning tools that stimulate the mind, and provide potential for the student to fully develop higher order thinking skills. The Academics' Choice Advisory Board consists of leading thinkers and graduates from Princeton, Harvard, George Washington University, and other reputable educational institutions.

**Creative Child Magazine** is a national bi-monthly publication providing parents with the latest information on ways to foster their child's creativity. The Creative Child Magazine's Awards Program is unique in that all items are reviewed by a committee of three groups: parents, educators and professionals -- winners are selected by the very people who purchase the products.

**The Tillywig Awards Program** delivers to consumers, retailers, and the media information on the best educational products available in today's marketplace. Awards are given on the basis of group tests. The BRAIN CHILD category focuses on "Exciting products that energize the mind while seamlessly blending fun and learning."

#### **More about Geometiles:**

**Geometiles**, a product of Imathgination LLC, is a fun, yet sophisticated tool that aims to spark an interest and lifelong love of math in kids in grades one through 12. Created by Yana Mohanty, Ph.D., a former mathematics instructor at the University of California, math coach and mother, this versatile set of interlocking tiles helps children discover mathematical concepts through hands-on exploration and play.

Comes with a free resource library.

Wholly made in the United States using safe, durable materials without phthalates, lead or toxic paint.

Geometiles come in three different 32-piece Mini Sets (retail price: \$30), a 96-piece Full Set (\$85) and a 512-piece Jumbo Set (\$385).
